PROFESSIONAL PROFILE

Game & Systems Programmer with experience leading technical development in multiple indie projects and Game Jams. Specialized in systems architecture, movement mechanics, and performance optimization in Unity and Unreal Engine. Proficient in version control and production pipelines for independent studios.

EXPERIENCE (Main games)

Xowen Studio | Programmer & Designer

- Developed and implemented mechanics and features in Unreal Engine 5 projects, prioritizing technical problem-solving and optimization.
- Participated in the full development pipeline, applying standardized game production methodologies.
- Completed 192 hours of certified technical training in Game Programming and Production, endorsed by Xowen Studio and the Ministry of Production of Mendoza.

Soul Ascension | Lead Programmer & Producer

Winning Game Jam project developed in Unity (C#).

- Designed and implemented the core "Grappling Hook" mechanic and 2D locomotion, optimizing game feel and movement precision.
- Developed an Endless Loop level generation system.
- Programmed and implemented the general game UI.

Ascenso | Solo Developer

- Developed the core gameplay system using Blueprints in Unreal Engine, prioritizing component modularity.
- Optimized rendering and large-scale asset management using Nanite, LODs, and World Partition to ensure stable 60 FPS performance.

Ritos y Retos | Gameplay Programmer

Micro-games title with modular architecture developed in Unity (C#).

- Implemented a scene management architecture to control dynamic flow across multiple minigames.
- Programmed win/loss validation systems and session data persistence for player progress tracking.
- Programmed and implemented the general game UI.

TECHNICAL STACK

- Engines: Unity (C#), Unreal Engine (BP/C++).
- Languages: C#, C++.
- Version Control: Git, Anchorpoint and Diversion.
- Unreal Tech: Nanite, LODs, World Partition and more.
- Unity Tech: WebGL, Scriptable Objects, Scene Management.
- Systems: Gameplay Mechanics, State Machines (FSM), UI/UX, AI Behavior.
- QA Testing: Functional testing, bug reporting, and Alpha phase testing experience.
- Multimedia & Assets: Aseprite (Pixel Art), Krita (2D Art), and audio integration knowledge.

IDIOMAS

- English: Advanced (Work experience with a US-based company).
- Spanish: Native.

EDUCACIÓN

Associate Degree in Game Development Universidad de Mendoza (UM) | Feb 2025 - Present

Information Systems Engineering (Partial Studies) Universidad Tecnológica Nacional (UTN) | Feb 2021 - 2024
